ENTER THE DIGITAL WORKFLOW

The first step
to the digital
workflow

Hyper realistic
scan with textures
and real colors

Ergonomic scan:
accurate and intuitive

Multiple scanning and
sterilizable guides

Diagnostic aid:
best communication
with your patients

The WOW intra-oral scanner brings you to a multidisciplinary world with no barrier between **orthodontics**, **implantology** and **prosthodontics**.

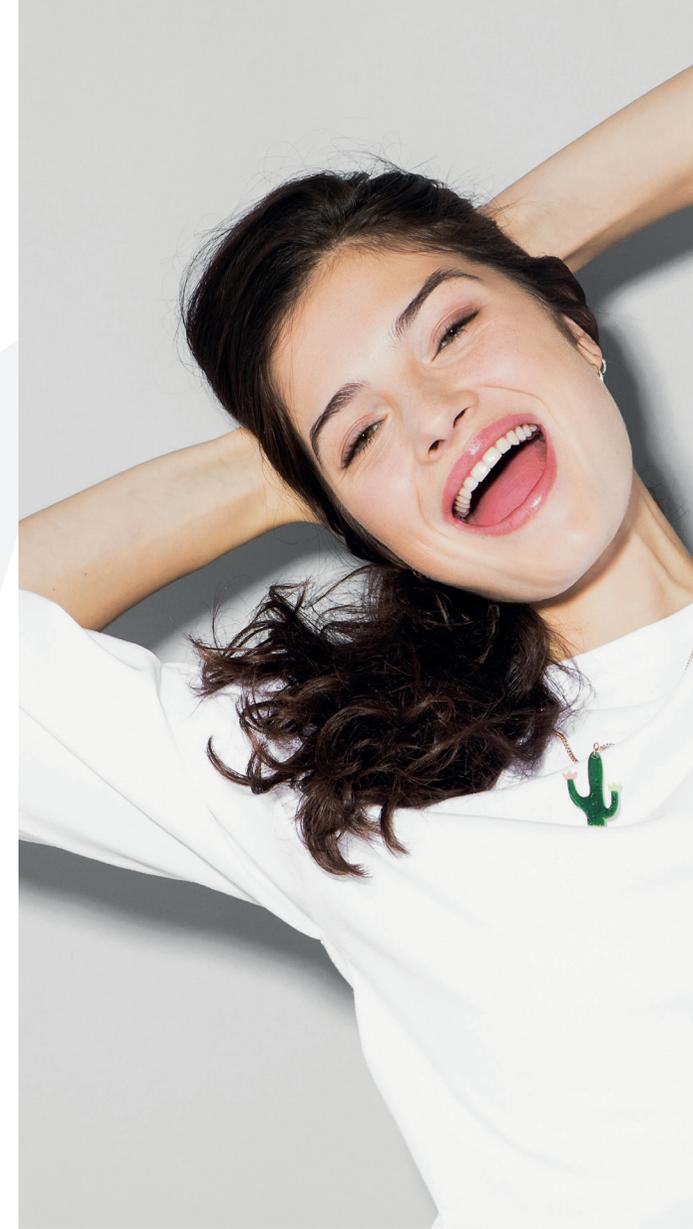

A HELPING HAND TO ORTHODONTICS

1

In collaboration with the **Smilers®** orthodontists, you elaborate a treatment plan to give the patient back his power of smiling.

With a simplified grip, the scanner guides you to the orthodontics practice. From an impression taken in a few minutes, you address a digital file directly to our planning and manufacturing center for **invisible aligners Smilers®**.

smilers

START THE DIGITAL DENTURE REVOLUTION

WOW™ guides you to a limitless prosthetic universe. From WOW™ optical impression, you access the **Circle™ removable prosthesis solution.**

In just a few clicks, send your .STL and .PLY files to your free Circle™ interface, select your online treatment plan and place your prosthetic order to your lab.

2

Within 5 working days, you receive a **100% custom-made prosthesis**, produced in France (74). Designed with the Circle™ technology used by your prosthetist - developed exclusively with the CNRS (French National Centre for Scientific Research) - the prosthesis fits perfectly your patient's mouth, and this directly at the second appointment.

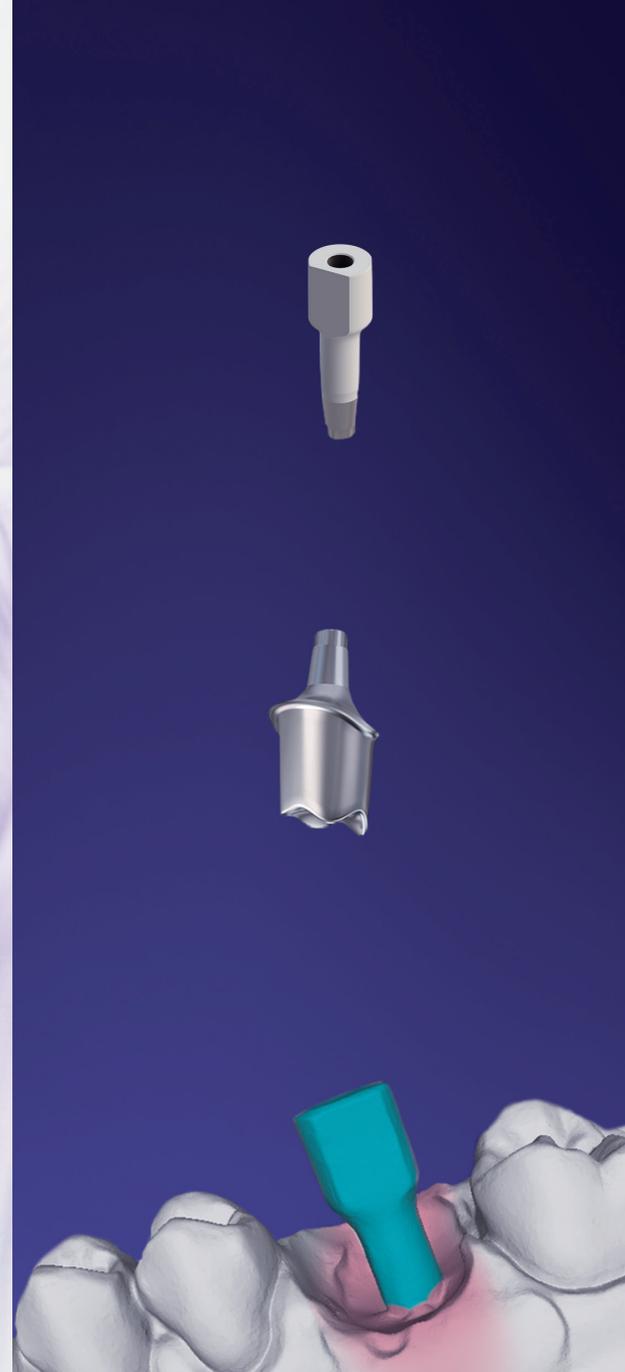

IT'S TIME TO IMPLANT THE FUTURE

WOW gives you access to **all Biotech Dental's implant solutions**. With a specific scan-body, you digitally enter the position, inclination and orientation of the implant reflecting the rest of the teeth and soft tissues. This allows to design custom-made abutments and prosthetic components perfectly adapted to the morphology of your patient.
